#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 02 October 2003.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 9-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 9-16 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission received on October 2, 2003 has been entered.

### ***Response to Amendment***

Applicant's "Amendment" received on October 2, 2003 has been considered.

Claims 9, 11, 13, and 15 are amended. Claims 9-16 are pending and an action on the merits of these claims follows.

### ***Response to Arguments***

Applicant's arguments with respect to claims 9-16 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 9, 11, 13, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,854,746 to Yamamoto et al.** Yamamoto discloses a processing system, an output unit and output method comprising:

- receiving and storing information from a material supplier regarding available material based on specification requirements and date of delivery of material, the specification requirements being presented by a manufacturer who supplies the commodity to the demander (see at least col. 4, lines 42-66; col. 5, lines 21-25; col. 5, lines 45-62; col. 5, line 65 – col. 6, line 17; col. 11, line 45 – col. 12, line 8; col. 12, lines 16- 32; col. 15, lines 58-63; col. 19, lines 60-67);
- storing and receiving information on available processing corresponding to the specification requirements and time of delivery of the processing (see at least col. 5, lines 65-62; col. 5, line 65 – col. 6, line 17; col. 11, lines 45 – col. 12, line 8; col. 19, lines 60-67);
- inputting information on desired material and desired processing for constructing elements constituting a commodity (see at least col. 4, lines 42-66; col. 5, lines 21-25; col. 5, lines 45-62; col. 5, line 65 – col. 6, line 17; col. 11, line 45 – col. 12, line 8; col. 12, lines 16- 32); and
- outputting information the available material and the available processing corresponding to the input information on the desired material and the desired processing, and general date of delivery of a commodity based on the date of delivery of the material and the time of delivery of the processing (see at least col. 4, lines 42-66; col. 5, lines 21-25; col. 5, lines 45-62; col. 5, line 65 – col. 6,

line 17; col. 11, line 45 – col. 12, line 8; col. 12, lines 16- 32; col. 15, lines 58-63; col. 19, lines 60-67).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 10, 12, 14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,854,746 to Yamamoto et al. in view of the article “Earth-friendly good”.** Yamamoto substantially discloses the claimed invention, however, it does not explicitly disclose the thinned-out woods. However, Yamamoto discloses raw materials (see at least abstract and summary of invention). Yamamoto does not disclose that his raw material is specifically is thinned-out wood. The article “Earth-friendly good” teaches the raw material is thinned-out wood. (See whole article)

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify the system, method, and unit of Yamamoto, to include the thinned-out woods, in order to provide an order with reference to the raw material, such as thinned-out woods, attributes so that the raw materials can be made available in amounts just necessary and sufficient for current production needs without the disadvantage of placing an unnecessary order (Yamamoto col. 4, lines 60-67).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,325,304 to Aoki discloses a production instructing apparatus which is designed to produce products in proper quantities in compliance with a received order and under the producing capacity thereof.

U.S. Patent No. 6,088,626 to Lilly et al. discloses a computerized system for scheduling work orders for manufacturing products in a manufacturing process.

U.S. Patent No. 6,415,194 to Gleditsch et al. discloses a computer system and methods used in manufacturing resource planning, specifically for determining the daily demand for raw materials and other manufacturing resources used in manufacturing process.
